

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

v. 14

HERTFORD
PRINTED BY STEPHEN AUSTIN AND SONS.

INTRODUCTION.

THE volume now completed, being the fourth of Chancery Proceedings *temp.* Charles I, and forming the fourteenth of THE INDEX LIBRARY, brings the Calendar of these numerous documents to a close as far as concerns the four manuscript volumes at the Public Record Office, known as Topham's Index, which cover the period indicated.

Reference was made in the first volume of this present series to the immense aid which Proceedings in Chancery afford to the genealogist and historical student, but besides the references there given to articles on this subject, further interesting information will be found in that most useful official handbook entitled "A Guide to the Public Records," published in 1891, by Mr. S. R. Scargill-Bird, F.S.A., Assistant-Keeper of the Public Records.

It may be urged that, having printed the Calendar of Plaintiffs in alphabetical, though not lexicographical order, THE BRITISH RECORD SOCIETY should complete the work by issuing an index to the Defendants in similar alphabetical order, whose names are of no less interest to searchers than are those of the Plaintiffs.

While fully admitting the utility such an index would have, the Council urges that having printed the Calendars, Subscribers are now in a position to do the searching necessary at their own homes, instead of, as heretofore, wasting valuable time at the Public Record Office. The Council therefore considers that, since the rearrangement and printing the list of Defendants in index form would be a very costly undertaking, the Subscribers' money will be better spent in publishing other Calendars which are still in manuscript.

The Council is arranging to proceed with the issue of other Calendars relating to Chancery Proceedings, and hopes before long to commence printing either Topham's Calendars for the reigns of Elizabeth and James I, or the very important Calendars of Pleadings and Depositions known as the "Six Clerks' Books," of which the first series consist of thirty-three volumes, and cover the period 1649 to 1714.

E. A. FRY.

March, 1896.
